Art Unit: 1648

Claims 1-12 are pending in this application. Claims 1, 2 and 5-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 11.

Claim 4, if written in independent form, appears to be allowable.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Rando et al.

(AQ), Ikematsu et al. (AP), Muller et al. (AO) or Cheung et al. (AN). Rando et al., Ikematsu et al., Muller et al., and Cheung et al. each respectively teach recombinantly produced and isolated human monoclonal rabies virus neutralizing antibody. More specifically, Cheung et al. teach a recombinant human anti-rabies neutralizing monoclonal antibody (Mab-57), as well as rFab57. Rando et al. also teach Mab57 at page 201. Muller et al. teach phage-display technology for the production of their neutralizing scFv fragments. Ikematsu et al. similarly teach mAb57. It is noted that claim 3 is anticipated by the respective references due to its breadth.

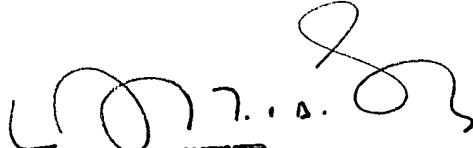

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laurie Scheiner, whose telephone number is (703) 308-1122. Due to a flexible work schedule, the examiner's hours typically vary each day.
